PROFESSIONAL PROFILE

Software engineer with 5+ years of professional experience across full-stack web development, cloud operations, API integration, data migration, test automation, and data analysis in Japan and India. Currently at Eclect, developing and maintaining web applications centered on Zendesk and AWS. I work across frontend, backend, APIs, cloud, databases, testing, release, and production support, and typically own technical implementation from requirements handoff through delivery. Since joining Eclect, I have delivered **12+ new applications**, completed 20+ enhancements and bug fixes, handled multiple migrations including **10,000+ records**, introduced Playwright E2E testing, and managed up to five projects concurrently. Previously, I led a six-person system integration project at Seaparts and supported Amazon Japan Kindle operations through SQL-based data analysis and process improvement. I hold JLPT N2 and work professionally in both Japanese and English.

CORE EXPERTISE

- Full-stack web application development with React, TypeScript, JavaScript, Node.js, Python, HTML/CSS, SQL, and REST APIs.
- Backend and integration work using Node.js, Python, Zendesk APIs, external REST APIs, AWS Lambda, and API Gateway.
- Cloud development and operations with AWS, including Lambda, API Gateway, S3, CloudWatch, IAM, DynamoDB, SNS, EC2, and Amazon Bedrock.
- Data migration and data processing across Zendesk and external systems, including migrations exceeding 10,000 records.
- Quality engineering and test automation using Playwright, Jest, Autify, Postman/Newman, unit testing, integration testing, regression testing, and E2E testing.
- Project leadership, technical ownership, prioritization, estimation, system design, and delivery across multiple concurrent workstreams.
- Data analysis and process improvement using SQL, PostgreSQL, Excel, Python, and VBA.

PROFESSIONAL EXPERIENCE

Eclect Co., Ltd. (株式会社エクレクト)

Software Engineer | Osaka (Hybrid) / Yokohama (Remote), Japan | Jun 2024 – Present

- Develop and maintain Zendesk applications and integrations using JavaScript, TypeScript, React, Node.js, Python, REST APIs, and AWS; improved external API resilience using retry/backoff and fallback handling.
- Receive requirements and specifications from consultants / PMs and independently handle technical design, implementation, testing, release, troubleshooting, and post-release maintenance.
- Served as primary engineer on 12+ production web applications and delivered 20+ enhancements / fixes, reducing manual work while handling up to five projects concurrently.
- Independently designed and built a Python pipeline migrating 10,000+ Zendesk ticket records through export, transformation, import, verification, and deletion, using phased batches and concurrent deletion. Also performed other Zendesk and external-system migrations.

- As sole engineer, upgraded seven AWS Lambda functions from Python 3.10 to 3.14; updated dependencies, development and production AWS SAM templates, fixed asyncio compatibility, tested, deployed, and investigated post-deployment issues.
- Introduced Playwright E2E automation with reusable fixtures and mocks plus Allure/Monocart reporting, catching regressions before release and reducing repetitive manual testing.

Technologies: TypeScript, JavaScript, React, Node.js, Python, HTML/CSS, Zendesk Apps Framework, REST APIs, SQL, jQuery, AWS Lambda, API Gateway, Playwright, Git, GitLab

SELECTED PROJECTS

Customer-Service Workflow Applications | May 2025 – Aug 2026

- As primary engineer, developed four Zendesk workflow applications that consolidate customer data and actions, streamlining customer-service work.
- Integrated Zendesk APIs and external REST APIs to consolidate information lookup, input, and workflow actions into the Zendesk interface.
- Developed a React/Vite Zendesk app integrating EC-CUBE customer, order, subscription, and points data; added Playwright E2E and Vitest/Testing Library unit tests.

Technologies: TypeScript, JavaScript, React, Node.js, Zendesk Apps Framework, REST APIs, Playwright, Git, GitLab

Zendesk RAG Reply-Assist Application | Nov 2025 – Mar 2026

- Developed a JavaScript/TypeScript Zendesk reply-assist application integrated with a RAG backend using internal data.
- Implemented ticket triage, RAG query polling, REST API response processing, loading and error states, testing, and issue resolution.

Technologies: JavaScript, TypeScript, Zendesk Apps Framework, REST APIs, Git, GitLab

Customer Chat Comment Summarizer | Aug 2024 – Sep 2024

- Developed a Zendesk ticket summarizer integrating the summarization API, backed by Amazon Bedrock, to summarize customer conversations.
- Implemented comment retrieval and preprocessing, summarization API integration, response formatting, UI display, configurable speaker filtering, testing, and issue resolution.

Technologies: JavaScript, HTML/CSS, Zendesk Apps Framework, REST APIs, summarization API (Bedrock-backed), Git, GitLab

Seaparts Co., Ltd. (株式会社シーパーツ)

System Engineer / Project Leader | Chiba / Yamaguchi, Japan | Apr 2022 – May 2024

Developed and maintained vehicle-recycling web applications spanning frontend, PHP/MySQL, and AWS. Progressed to lead a six-person system integration project while contributing to modernization and E2E testing.

SELECTED PROJECTS

System Data Integration Project | Oct 2023 – May 2024

- Led a six-person project integrating multiple independent business systems to reduce duplicate work, improve inventory management, and improve system connectivity.
- Prepared effort estimates and system architecture diagrams.
- Worked with business users to clarify requirements and specifications.
- Created functional designs, UI designs, and database file designs; also contributed to implementation.
- Managed schedule, progress, and quality and reported project status to management.

Technologies: Windows, Apache, MySQL, PHP, JavaScript, jQuery, AWS

Role: Project Leader | Team size: 6

E2E Test Automation | Aug 2023 – Oct 2023

- Introduced Autify to improve E2E testing efficiency and product quality.
- Created test scenarios and test plans, documented business workflows, optimized procedures, and executed tests.

Technologies: JavaScript, Autify

Role: Team Member | Team size: 6

PHP Version Upgrade | Nov 2022 – Aug 2023

- Migrated an existing web application from PHP 5 to PHP 8.
- Investigated and fixed compatibility issues and performed unit, integration, and regression testing.

Technologies: Windows, Apache, MySQL, PHP, JavaScript, jQuery

Role: Team Member | Team size: 4

Responsive UI Renewal | Aug 2022 – Oct 2022

- Contributed to a responsive UI refresh covering approximately 150 pages of an existing web application.
- Created screen specifications, designed UI in Figma, and implemented frontend updates with HTML, CSS, JavaScript, and jQuery.

Technologies: HTML, CSS, JavaScript, jQuery, Figma

Role: Team Member | Team size: 3

Amazon Development Centre (India) Private Limited

Associate - Digital Process JP | Chennai, India | Remote | May 2021 – Apr 2022

KEY ASSIGNMENT

Amazon.co.jp Kindle Operations and Process Improvement | Jun 2021 – Mar 2022

- Supported Amazon Japan Kindle e-book marketplace operations using internal tools, SQL, PostgreSQL, Excel, Python, and VBA.
- Performed pricing and data analysis to support business decisions on e-book pricing and discounts.
- Created operational and business reports and maintained standard operating procedures.
- Improved recurring operational processes and coordinated with stakeholders supporting the Japan marketplace.

Technologies: Windows, PostgreSQL, SQL, Python, VBA, Excel

Role: Team Member | Core team size: 8

TECHNICAL SKILLS

Languages: TypeScript (2+ years), JavaScript (4+ years), Python (3+ years), PHP (2+ years), HTML/CSS (4+ years), SQL (4+ years)

Frameworks / Runtimes: React, Node.js, Vite, Zendesk Apps Framework, jQuery

Databases: MySQL, PostgreSQL, Supabase

Cloud / Infrastructure: AWS, Lambda, API Gateway, S3, CloudWatch, IAM, DynamoDB, SNS, EC2, Amazon Bedrock, Docker, Cloudflare Pages, Cloudflare Functions

APIs: REST APIs, Zendesk API

Testing / Quality: Playwright, Jest, Autify, Postman/Newman, E2E testing, regression testing

Version Control / CI: Git, GitLab, GitHub, GitHub Actions

Operating Systems: macOS, Windows, Linux / Ubuntu

AI Development Tools: Claude Code, Codex

PERSONAL PROJECT

Meguruto - Japan Travel Recommendation and Itinerary Planning Web Application

Website: <https://meguruto.app>

- Build and maintain a full-stack Japan travel-planning product; independently own engineering and production deployment.
- Integrate destination, transport, travel-time, and budget data to support recommendation and itinerary-planning features.
- Own product planning, requirements, data design, frontend / backend implementation, API integration, testing, deployment, and quality improvement.

Technologies: React, TypeScript, Supabase, Cloudflare Pages / Functions, REST APIs, Playwright, Vitest

EDUCATION

National Institute of Technology Karnataka (NITK), India

M.Tech, Manufacturing Engineering | First Class | Jul 2017 – Oct 2019

Shivaji University, India

B.E., Mechanical Engineering | First Class with Distinction | Jul 2012 – Jun 2016

CERTIFICATIONS AND LANGUAGES

Japanese Language Proficiency Test (JLPT) N2 | Jan 2024

English: Fluent / bilingual professional proficiency

Japanese: Professional working proficiency; JLPT N2

PUBLICATIONS

Microstructural Evolution of Mg-Zn-Gd Alloy Using Equal Channel Angular Pressing to Enhance Mechanical and Corrosion Properties

Journal of Materials Engineering and Performance | Springer Nature | 2025 | Second author

<https://doi.org/10.1007/s11665-025-11054-3>

Effect of ECAP on sliding wear behaviour of Mg-Zn-Gd-Zr alloy

Materials Today: Proceedings | Elsevier | 2020 (online 2019) | First author
